
NETTPROTECT

CONSTANT VULNERABILITY SCANNING

Product Update

**New and improved
features with Version 2.0**

NETTPROTECT

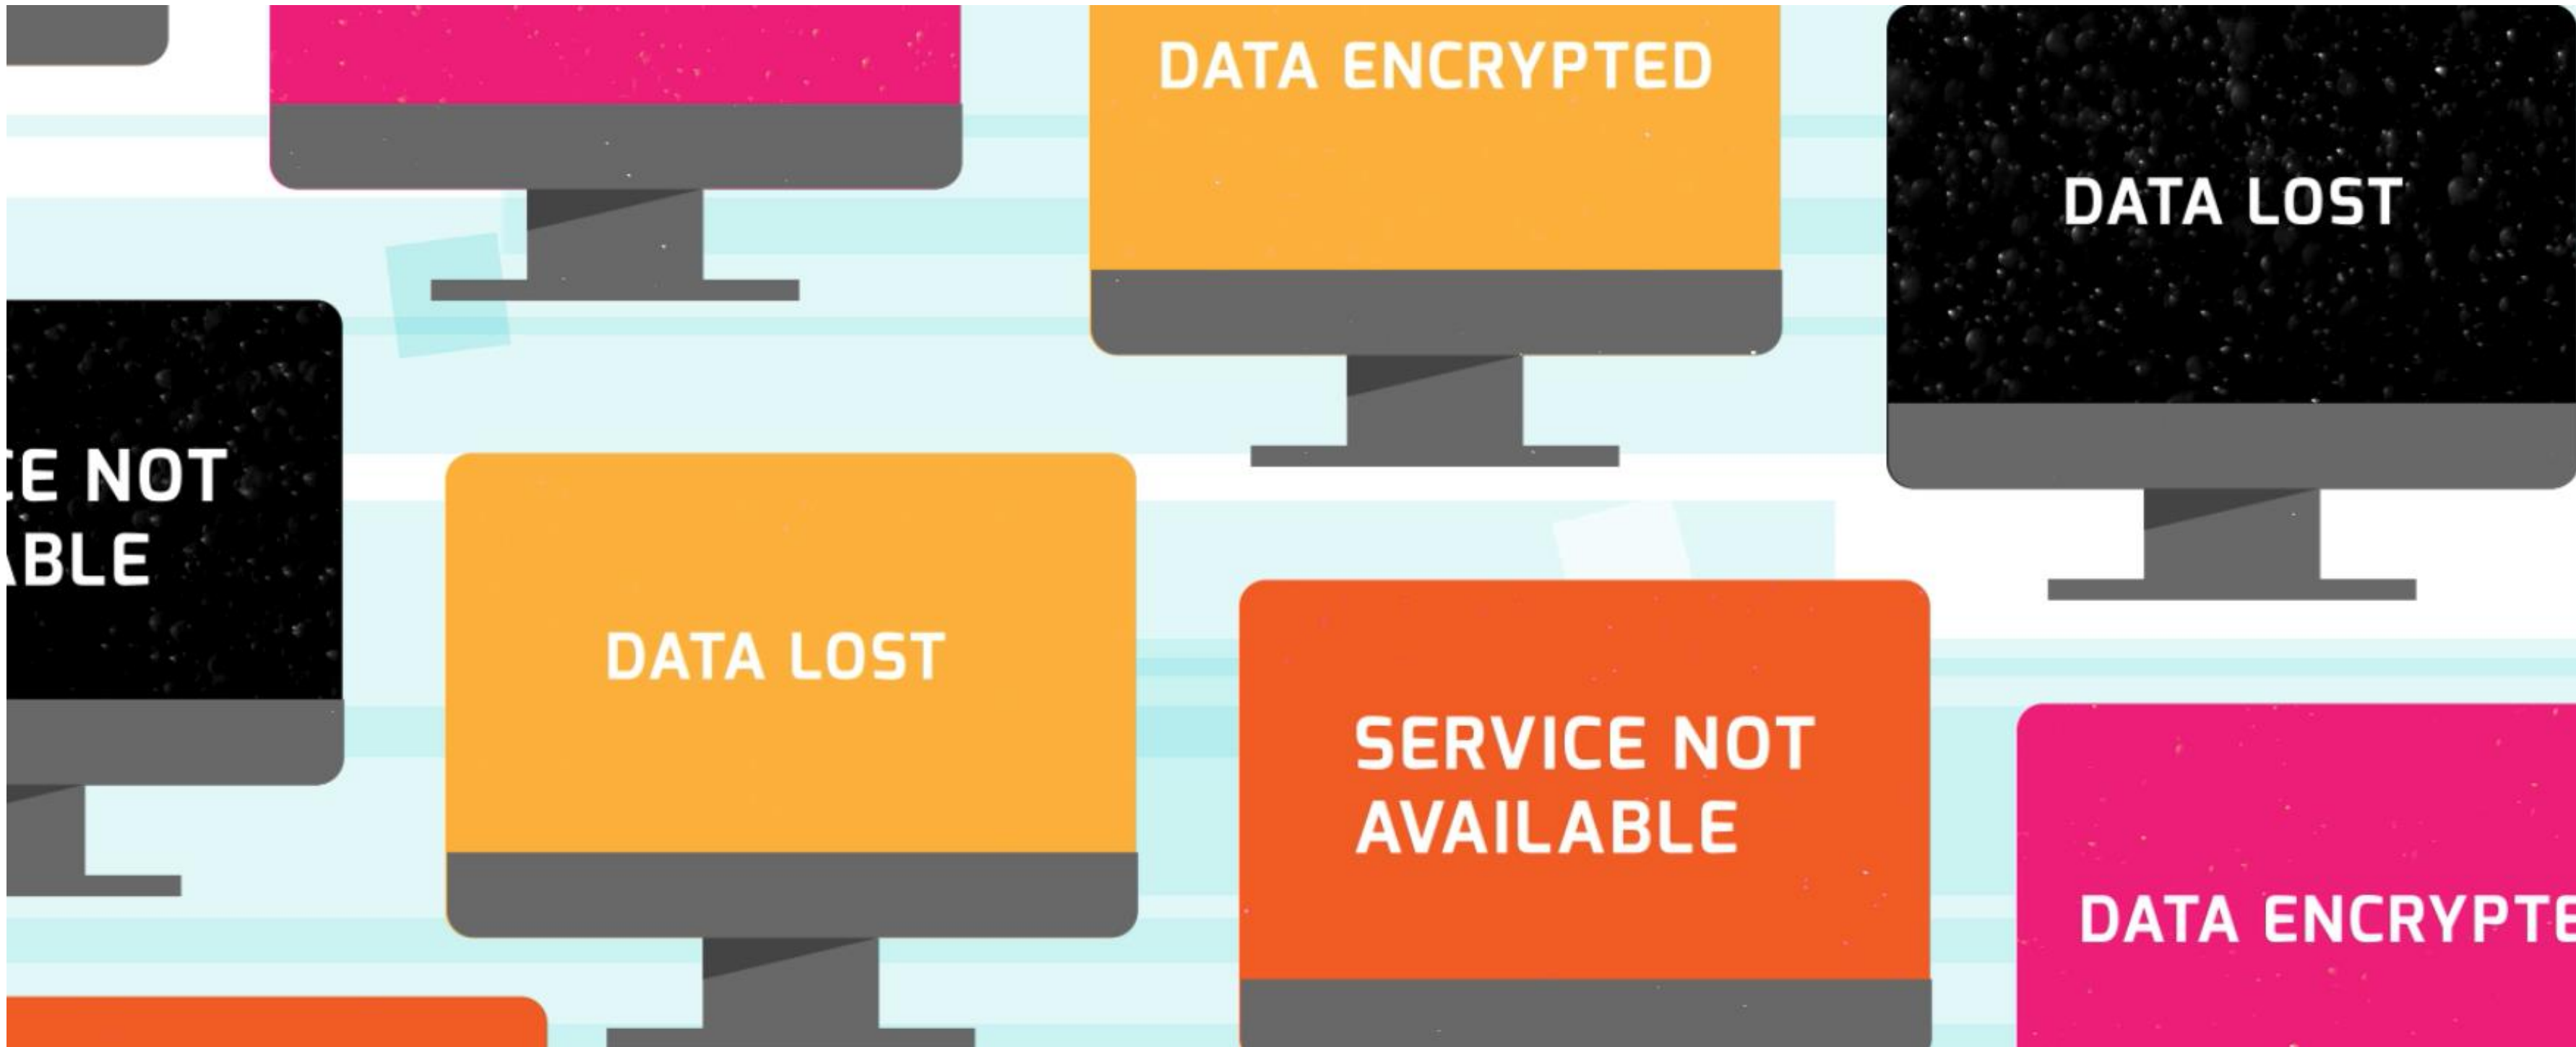

About us

Continuously enhancing the security posture of your business through vulnerability detection & management. Information Security is no longer the 'ignore it, maybe it will go away' conversation that it used to be.

We offer a managed service to take care of your vulnerability and assessment requirements.

The reality is that if your systems have not been compromised, or if your systems have not measured and reported on an attempted breach of some sort, it is only a matter of time.

Vulnerability assessments fit into the same category as penetration testing, except that vulnerability assessments tend to be more focused on the internal network as opposed to external facing assets. It is for these reasons that BUI brings you NettProtect.

Updates

New improvements include

- New Scanner Virtual Machine, no need for inbound FW changes, makes deployment fast
- Microsoft Sentinel integration
- *Unlimited IP scans
- New Reporting Templates
- Supports Windows, Linux, Mac clients
- Network Map, showing vulnerabilities per subnet
- Azure, GCP and AWS scans available
- Cloud Engine scales to millions of Clients and Billions IP's.

NETTPROTECT

Pricing

Pricing is based on your vulnerability exposure. This is measured by the number of IP addresses you choose to Nettprotect

Type	Service	RRP	Period
*Unlimited	Scanner	\$4 500,00	Per Year
Per Unit	Agent	\$6,91	Per Year
**Deployment	Deployment	\$2 073,60	
Key			
*	Fair Use Policy Applies		
**	Optional Scanner Deployment Assistance		

"We have been working hard to deliver the next update to **Nettprotect**, our Vulnerability Scanning Service, and excited to bring these new feature to our customers" Ryan Roseveare
